Creating a Timeline

Write about it

Chapter 1-2 (p 3-28)

Timelines visualize events during a specific amount of time shown chronologically along a line. It helps you better understand history, a story, a process or any other form of an event sequence. Using a timeline can help you with more than just studying a story or process. In the workplace, managers use timelines to show what phases are already in the past, what is in the progress now, and what is supposed to be finished in future.

Directions: Review the data provided for you. Complete the blanks with information from the story regarding significant events.
